

# Installation From Add-Remove Programs

1. In Add/Remove programs press the Add New programs button
2. Press the button - CD or Floppy
3. When the Run Installation Program window comes up press the Browse button
4. When the Browse window comes up change the **Files of Type** at the bottom from Setup Programs to **Programs**
5. Choose Awserver855.exe and press **Open**
6. Make sure you install the program in **Accounts\Aw** (MOST IMPORTANT)
